TITIMITI META NETWORK

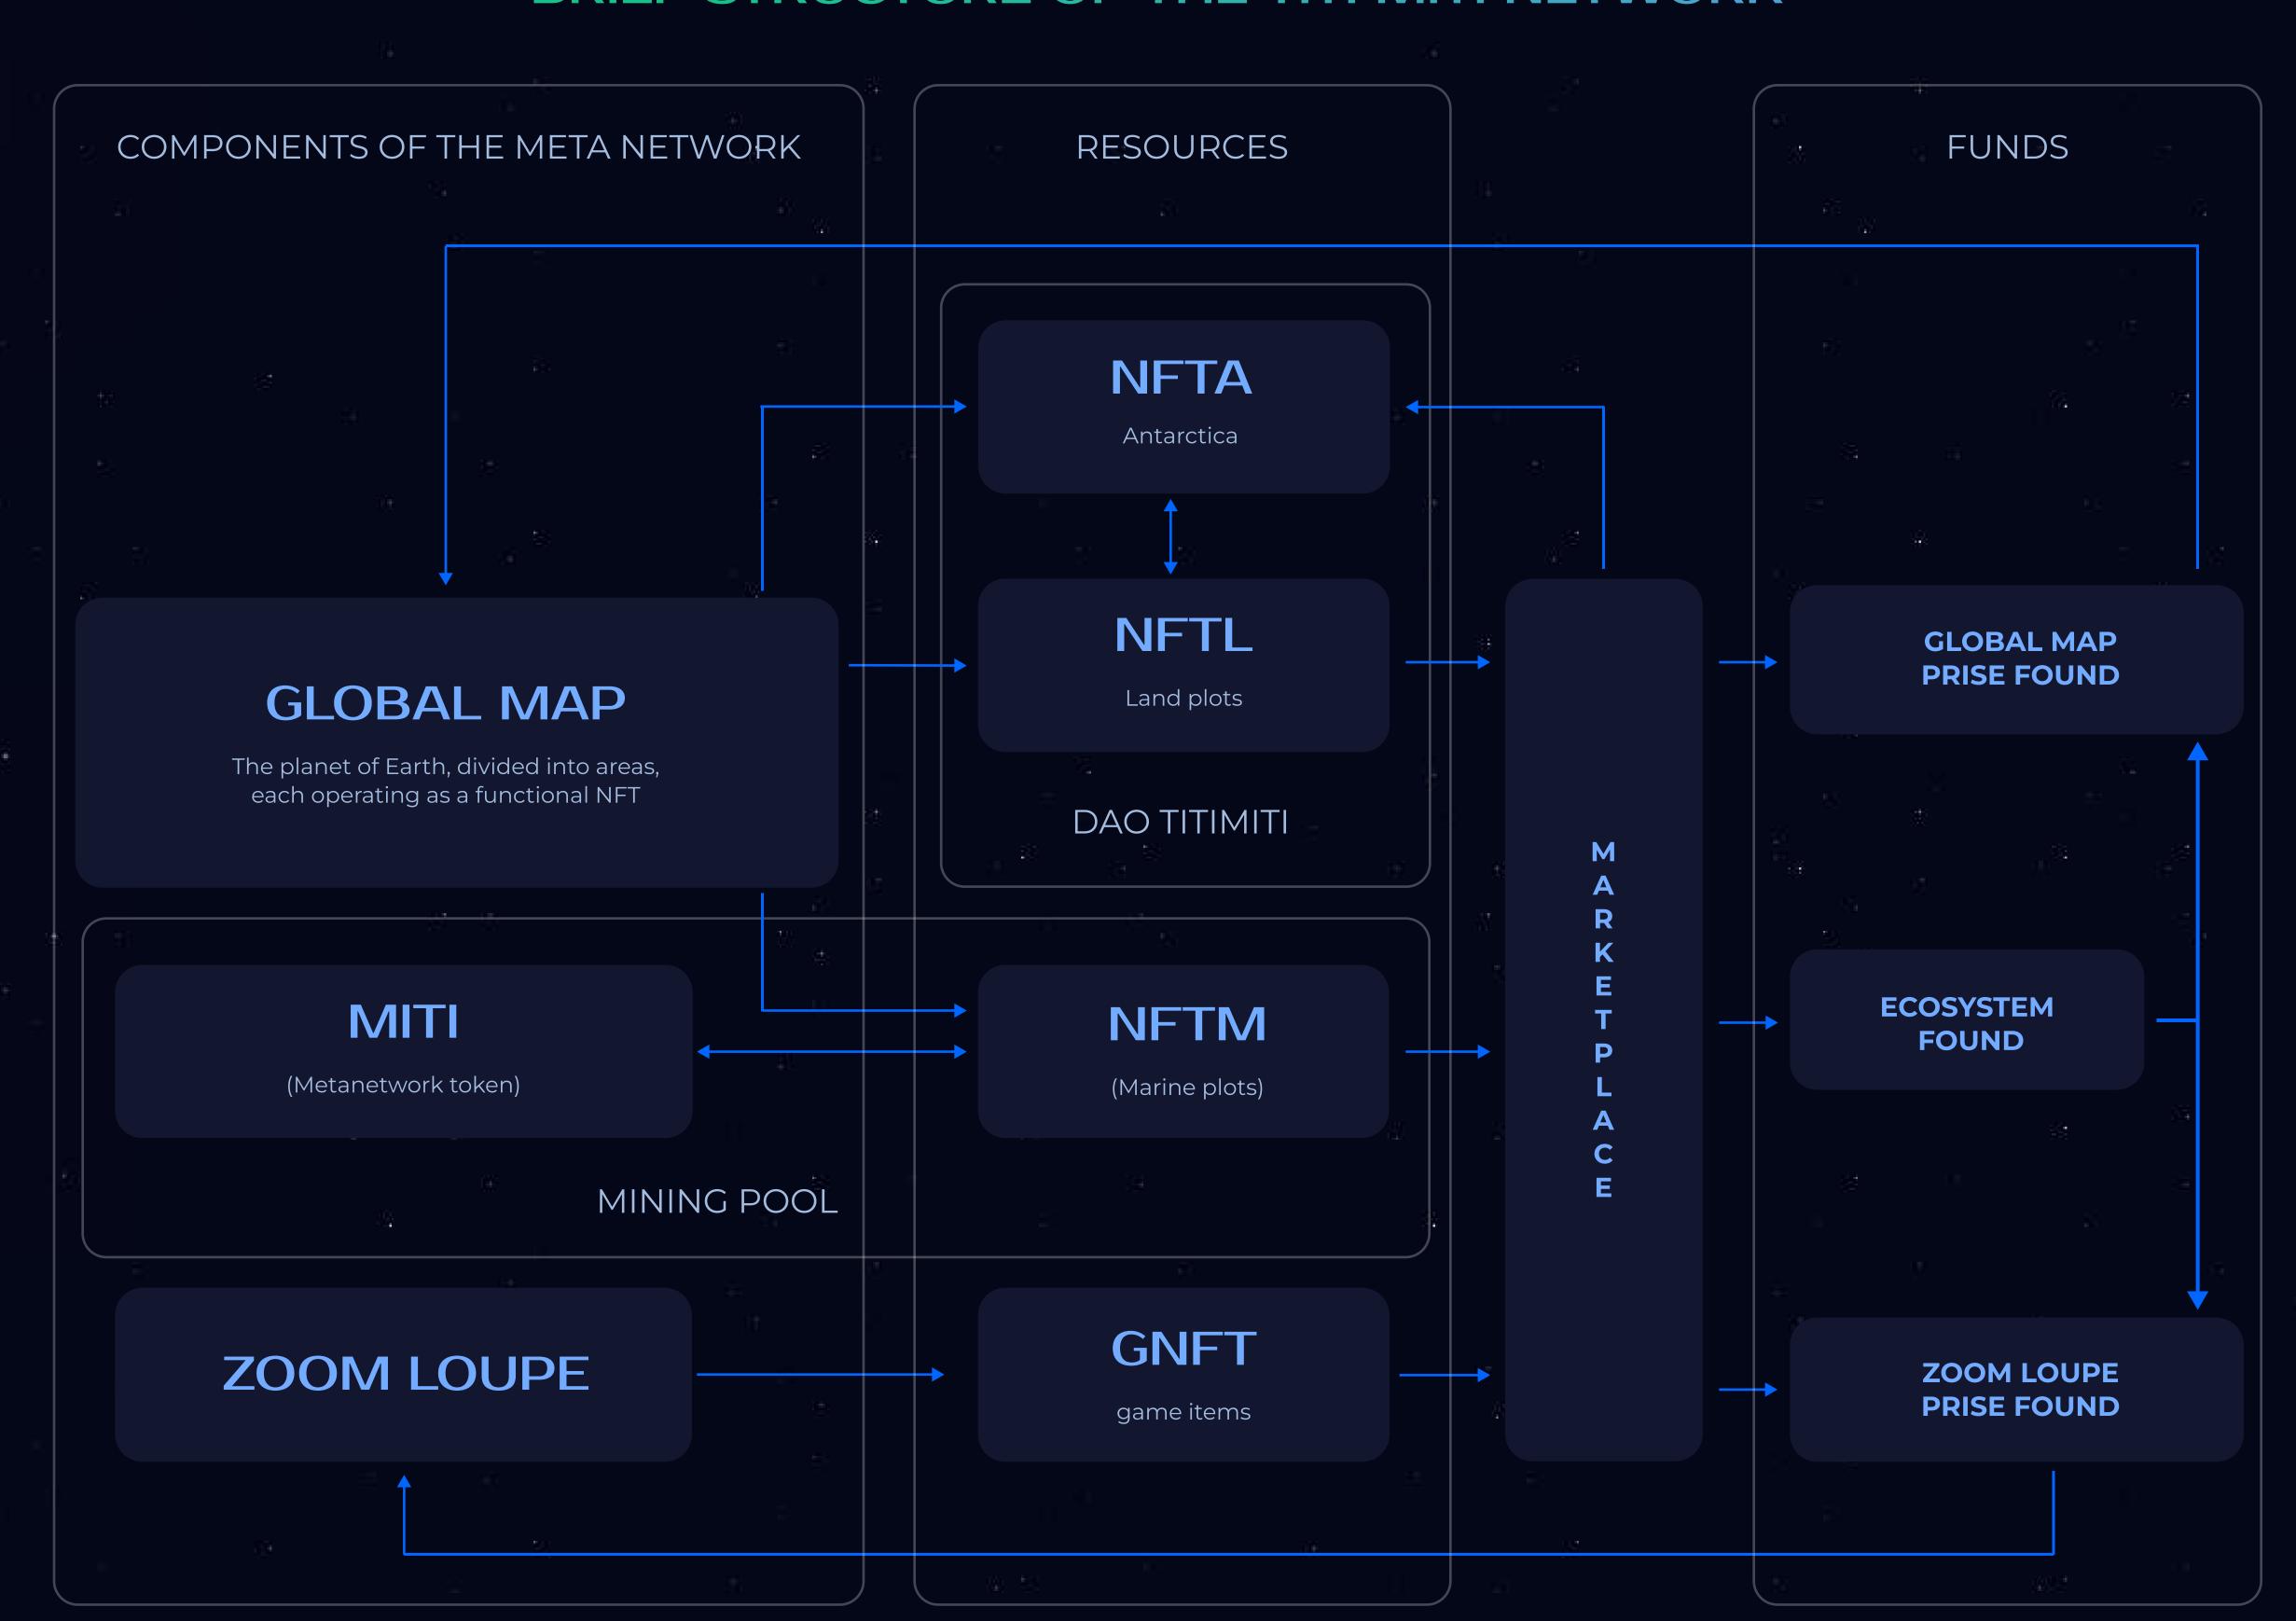

A gamified social financial platform built on the principles of distributed ledger technology. A next-generation marketing tool.

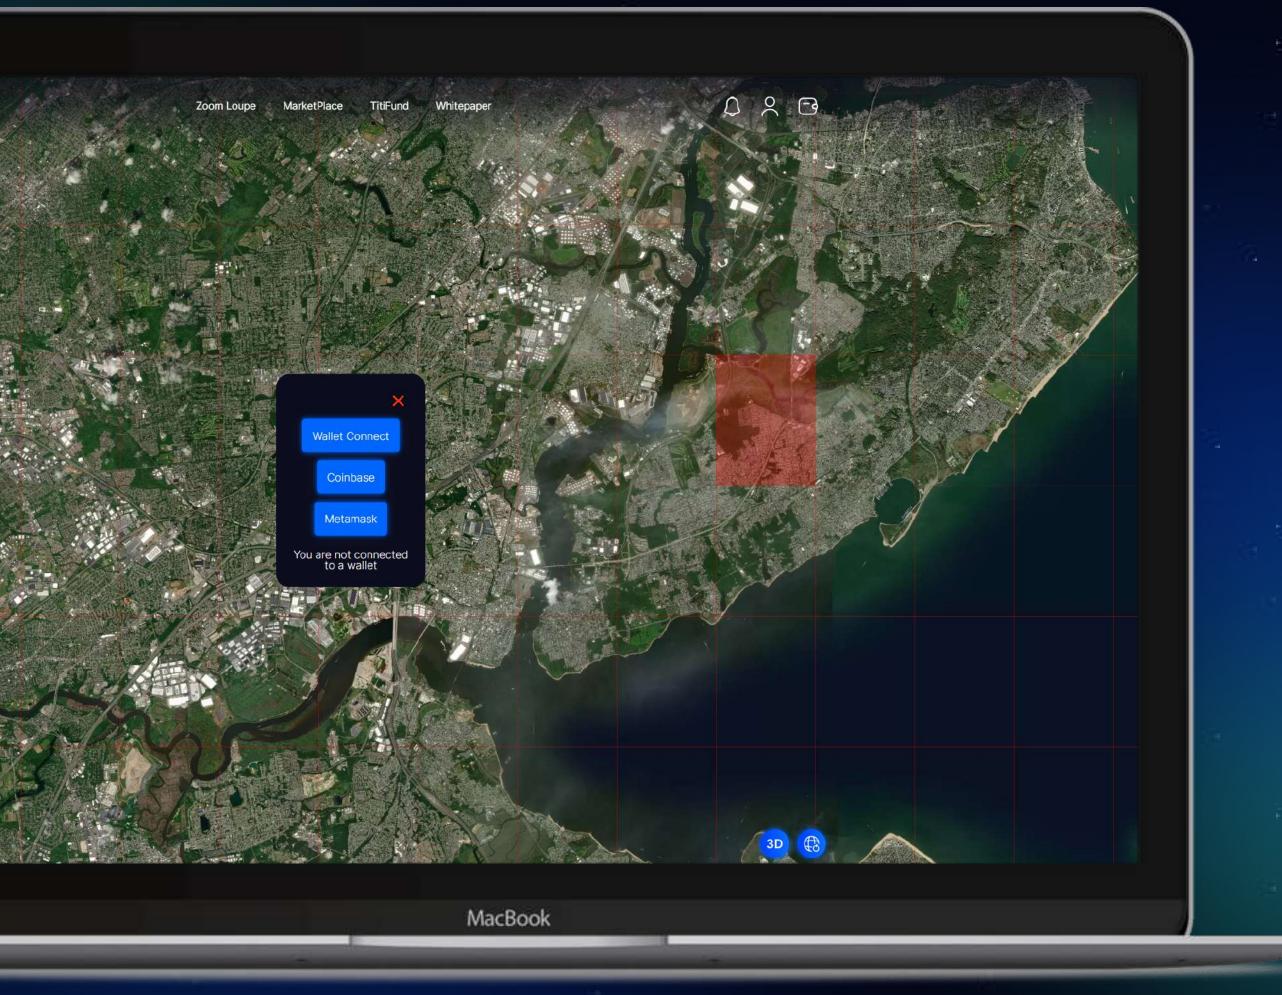

THE GOAL OF THE TITI MITI

Metanetwork is to transform human zeal and the pursuit of wealth into an asset that works for the benefit of all its participants, providing endless opportunities for marketing and integration for businesses.

BRIEF STRUCTURE OF THE TITI MITI NETWORK

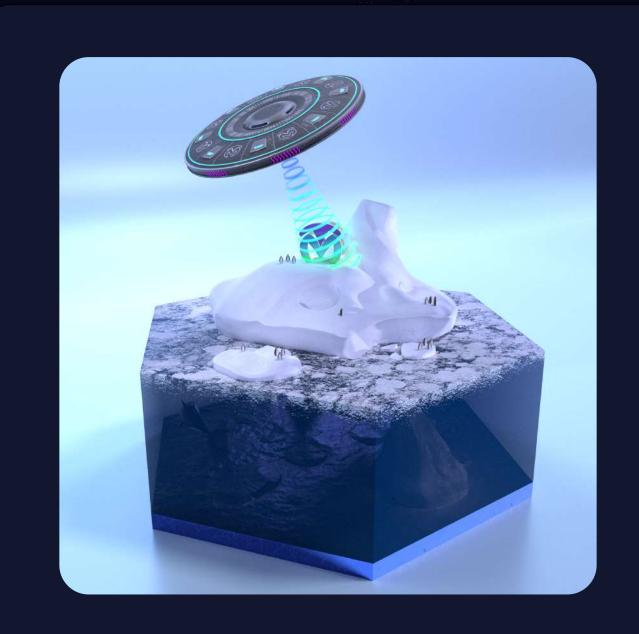

GLOBAL MAP

At the core of the metanetwork lies the concept of digital land ownership.

The planet is divided into plots of 9 km² for land and 90 km² for marine territories.

Each NFT plot on the planet is a functional, indivisible token that influences both the economy and the management of the TITI MITI metanetwork.

GLOBAL MAP PLOTS ARE DIVIDED INTO THREE TYPES

ANTARCTICA (NFTA)

156 745 УЧАСТКА

It belongs to the project development team; NFTA owners submit all key proposals for managing the TITI MITI metanetwork to the Landlords for consideration.

LAND PLOTS (NFTL)

14 971 111 УЧАСТКА ПО 100 USDT

Landlords (NFTL owners) receive a commission from the sale of GNFL and all treasures found by other players on their territory. They also participate in the management of the metanetwork through voting.

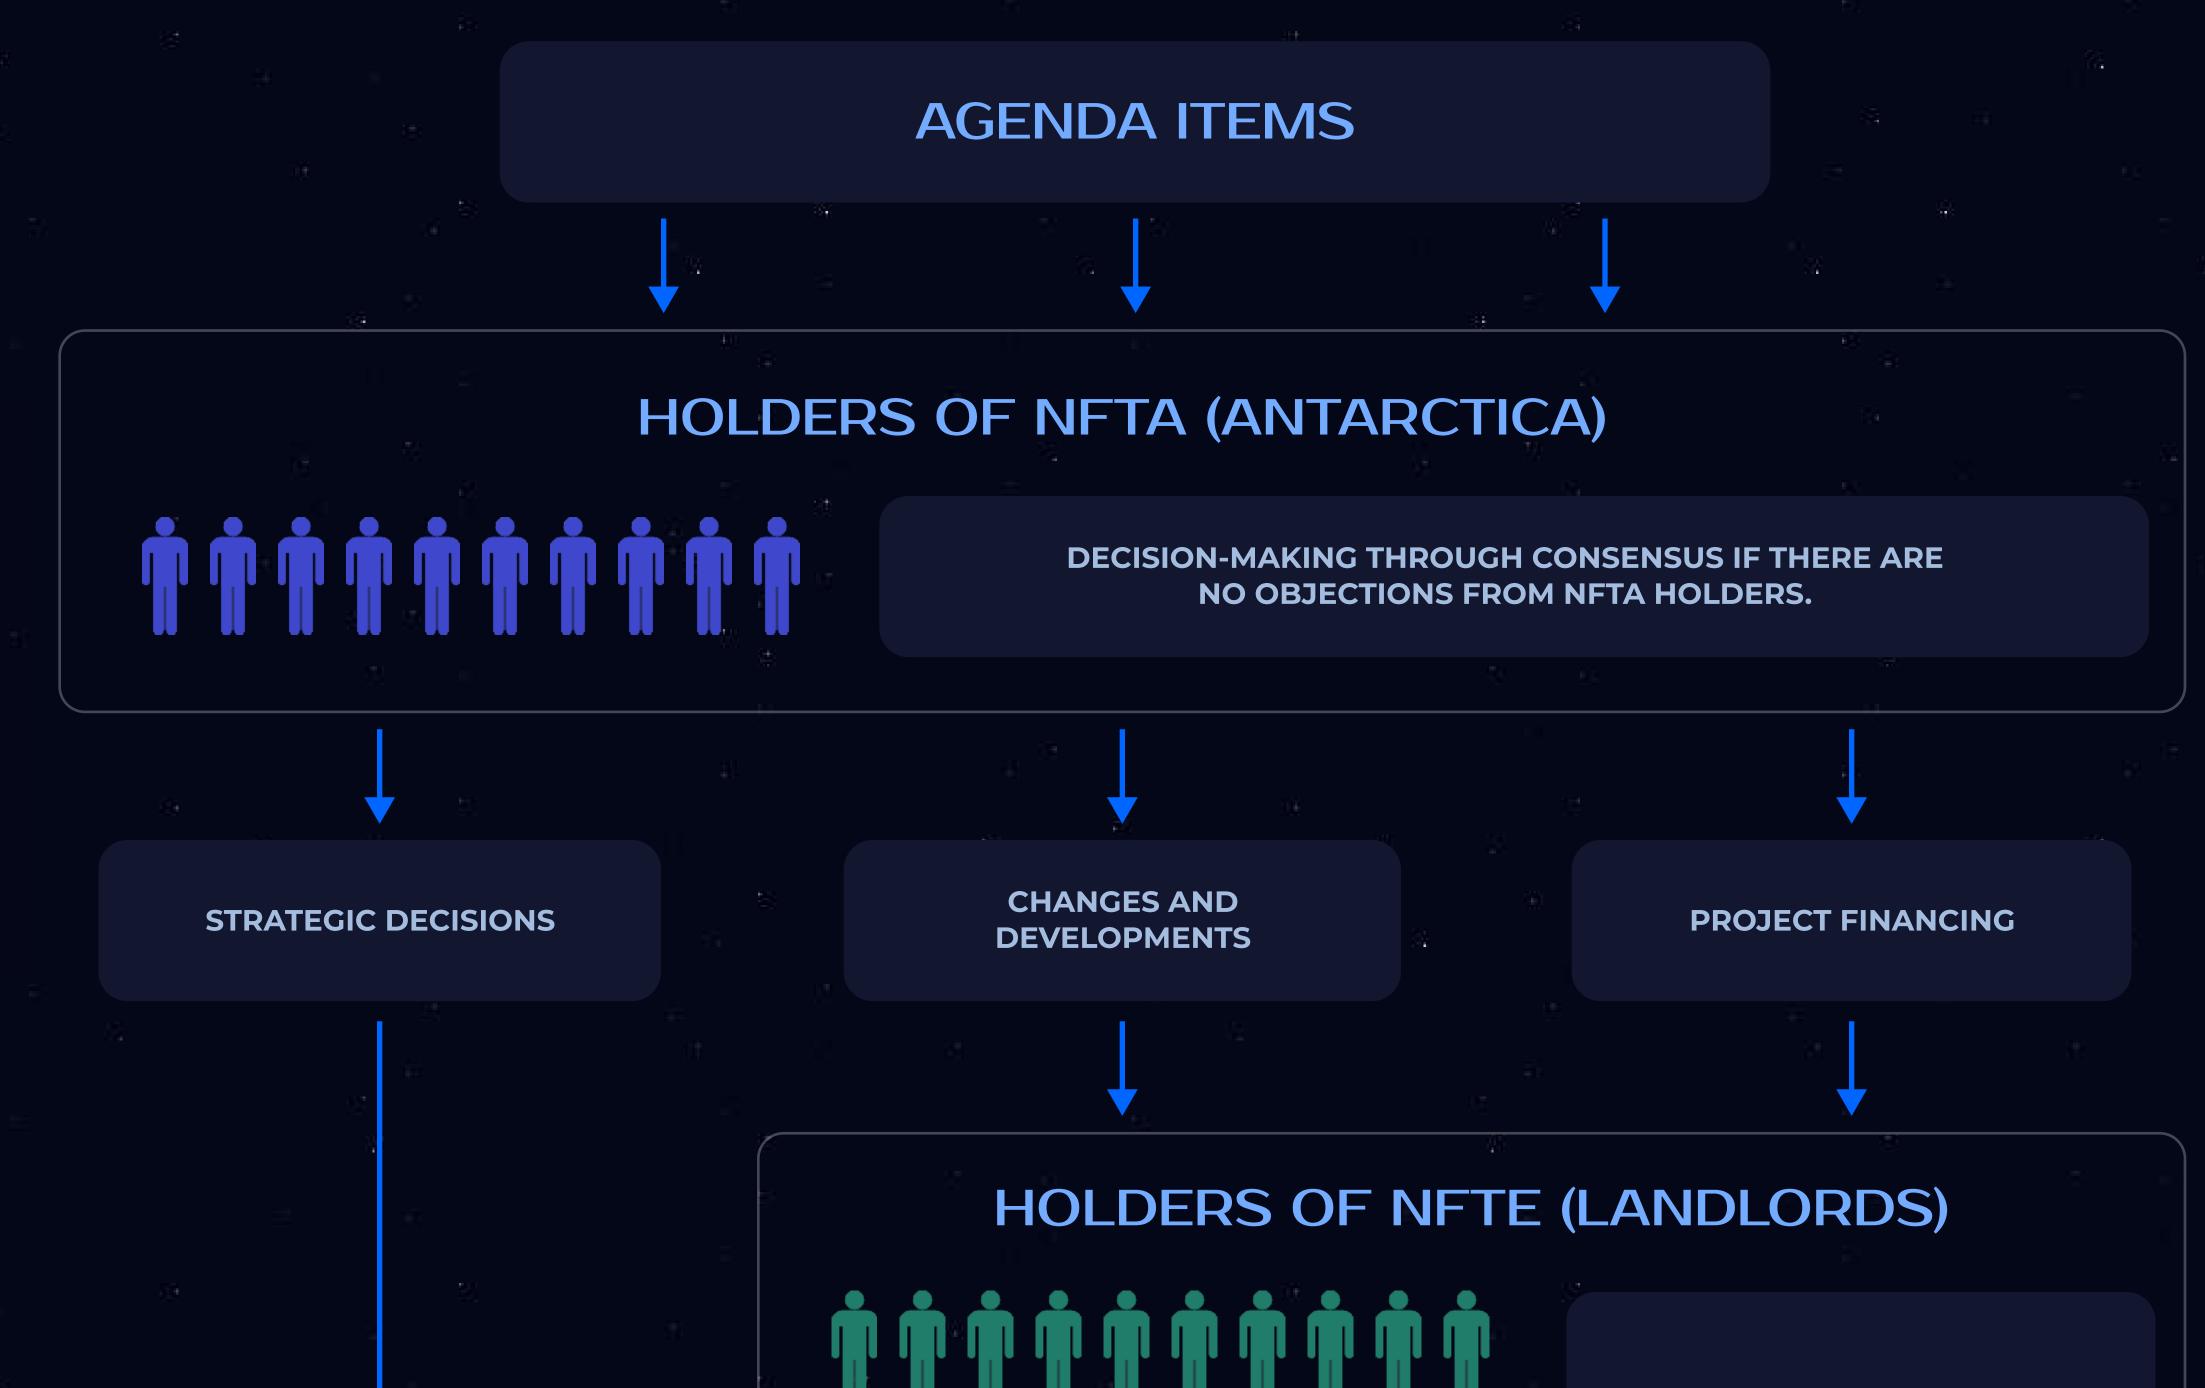

MARINE PLOTS (NFTM)

4 012 577 УЧАСТКА ПО 120 USDT

The primary function of NFTM is to mine frozen MITI (the metanetwork token). Mining occurs through MITI staking in interaction with NFTM.

DAO TITI MITI

The main function of the DAO (Decentralized Autonomous Organization) is to manage the TITI MITI metanetwork.

14 971 111 MITI - NFTL buyers revard

FUNDS ARE UNLOCKED UPON EXPLORATION OR LAND PURCHASE.

HOLD 42 238 889 MITI

ECOSYSTEM FOUND

MINING POOL

Every NFTM owner can activate their ocean (marine) plot for a specific period to mine MITI; this is called the MINING POOL.

To participate in MITI mining, one needs at least one marine plot (NFTM) or any amount of MITI.

MITI TOKEN MINING PROCESS IN THE MINING POOL

1

The creation of a mining pool occurs through the activation of a marine plot (NFTM) by its owner.

Other players choose the activated mining pool and freeze MITI in it for a period dependent on the mining stage.

3

To start mining, 28.5
MITI must be frozen in
the mining pool. The
pool owner can freeze
their own MITI.

4

The NFTM owner takes 70% of the MITI, pool participants take 20%, and 10% goes to the Ecosystem Found.

MINING IS LIMITED TO 114,000,000 MITI

Period: 3 month

Per period: 4.75 MITI

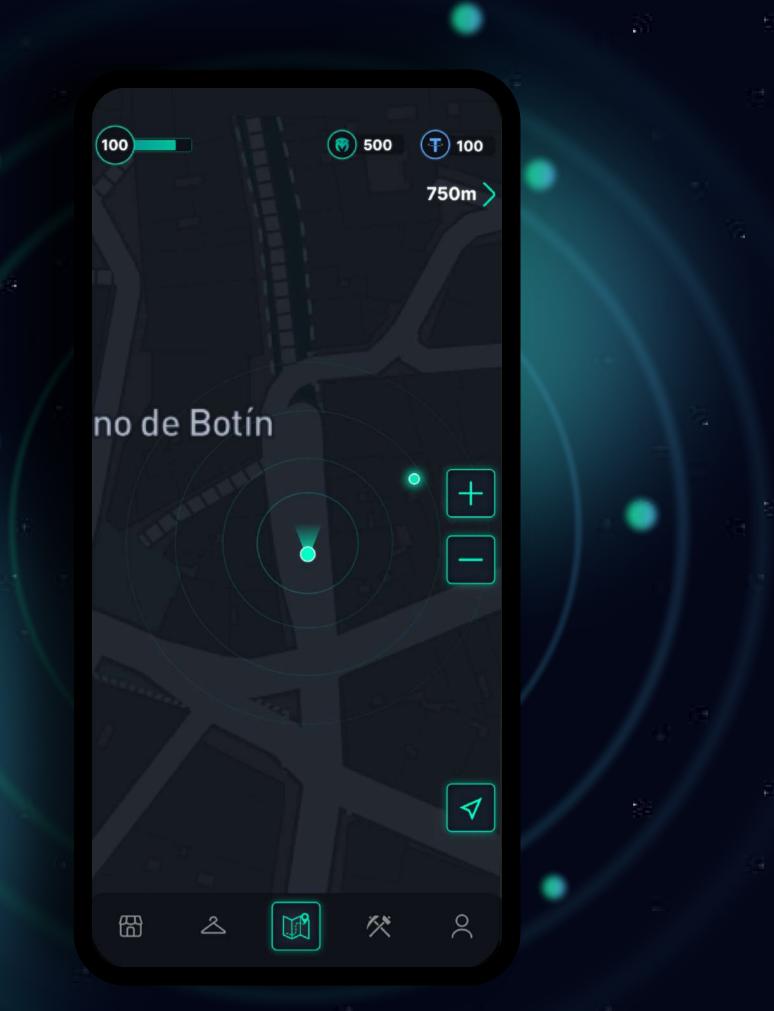

STAGE 4

3 000 000 NFTM

Duration: 24 months Income: 28.5 MITI

Period: 4 month

Per period: 4.75 MITI

ZOOM LOUPE

A unique metaverse within the TITI MITI metanetwork, bringing players worldwide together for treasure hunting, communication, and interaction.

Find chests on the map, open them using various gaming items (GNFT), and receive real rewards.

Look through the Zoom Loupe augmented reality window and enter an alternative gaming world where anyone can find real treasure scattered around.

Collect a full set of top-level gear (GNFT) and open the legendary chest with impressive valuables inside.

THERE ARE FOUR LEVELS OF ZOOM LOUPE CHESTS

WHAT CAN BE FOUND IN ZOOM LOUPE CHESTS?

GAMING NFT (GNFT)

For efficient chest searching and opening, players need special gaming items such as smartwatches, lock picks, and equipment. All these items are implemented as gaming NFTs and have their own unique characteristics.

LOCK PICKS

Lock picks are necessary for opening locks of a specific level. However, daring players have the opportunity to try their luck and attempt to open a chest with a lock pick from a lower level.

Each lock pick has such characteristics as the chance of opening and wear level. They can be repaired using repair kits.

LVL₁

LVL 2

LVL 3

LVL 4

LVL 2

LVL 3

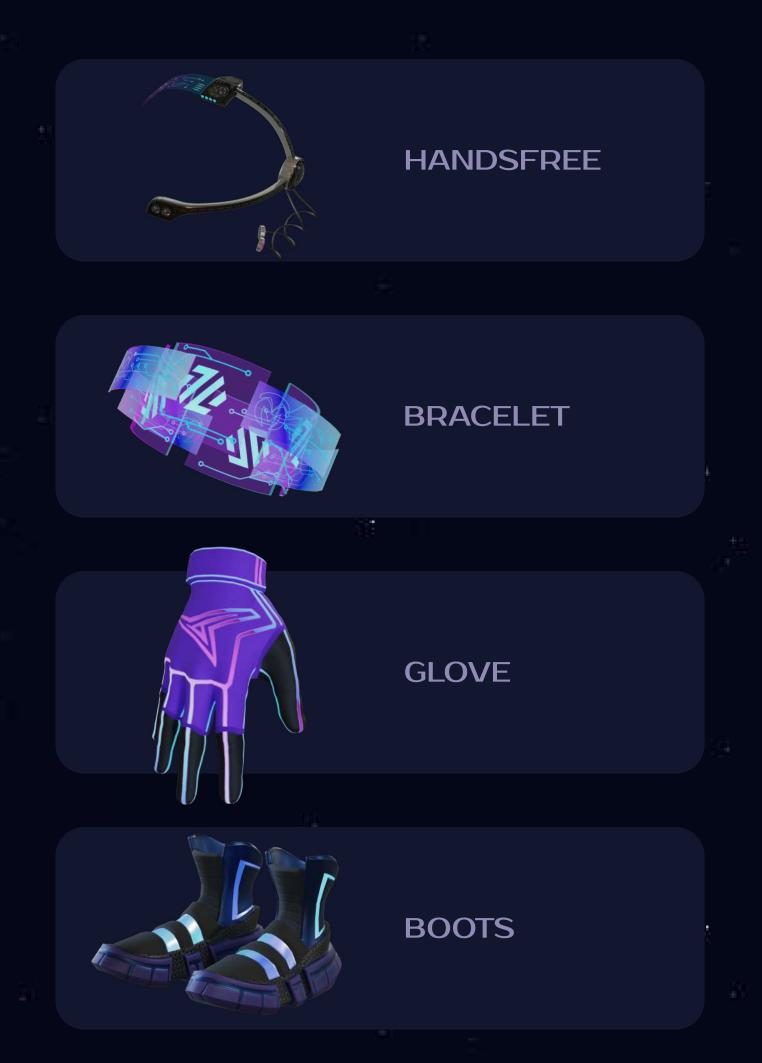

SMARTWATCHES WITH RADAR

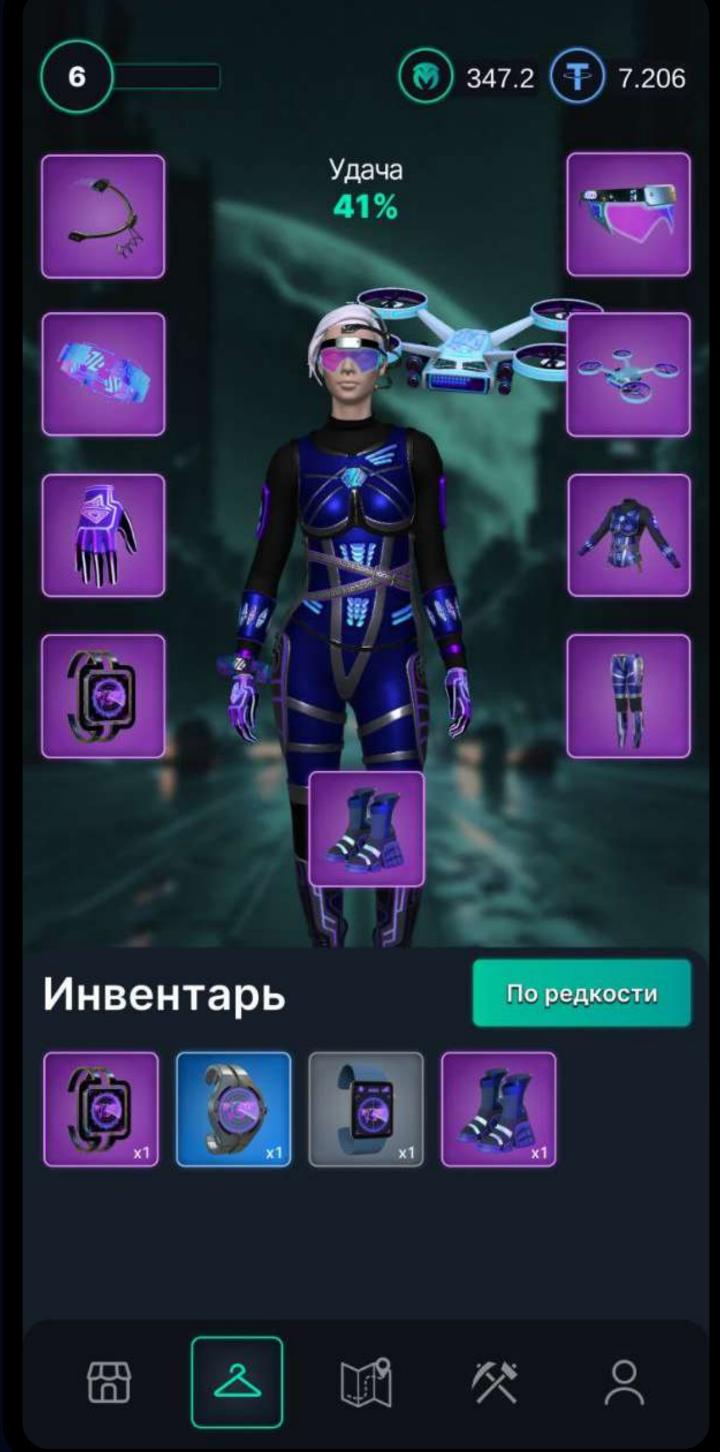

Smartwatches are necessary for finding chests of a specific level.

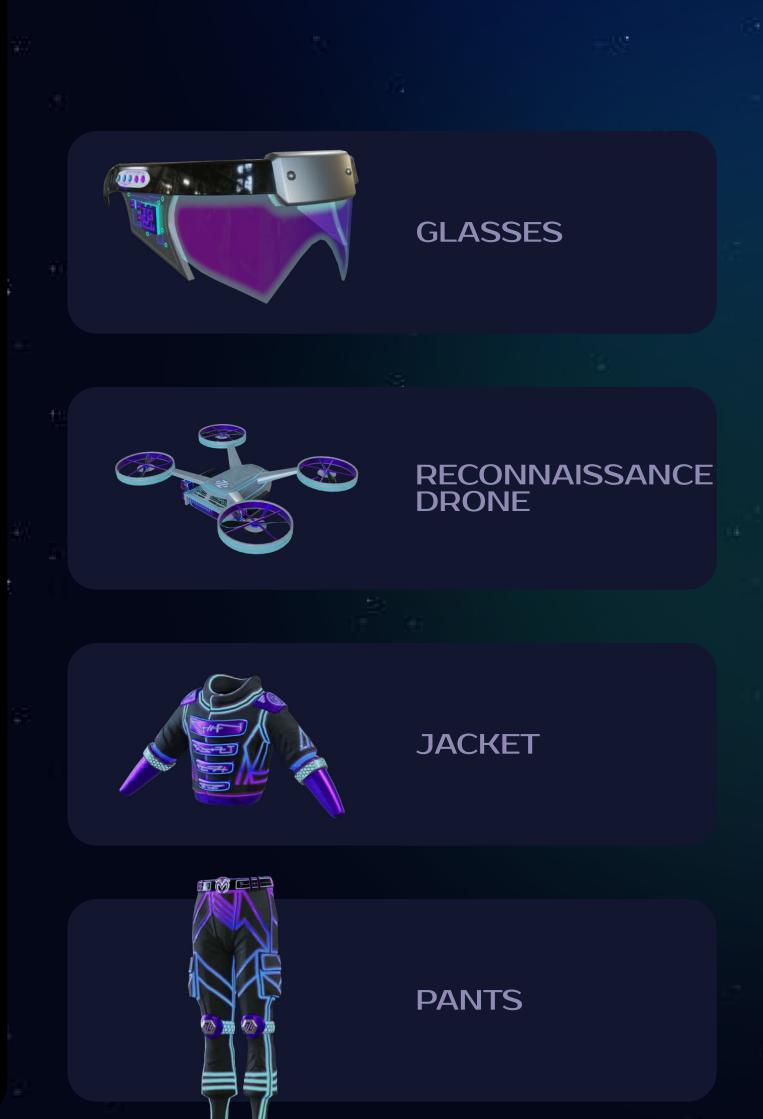

EQUIPMENT

To use lock picks above the first level, the user must have the necessary equipment.

The equipment level must correspond to the level of the lock pick being used.

RESOURCES FOR REPAIR AND IMPROVEMENT OF LOCK PICKS

Repair kits are used to repair lock picks, and components are used to improve them.

LVL 2

LVL 3

In addition to chests, players can find basic components on the map. By collecting a certain number of components, a player can sell or exchange them on our marketplace or craft them into a more valuable component from the next level.

MARKETPLACE

Using the marketplace, players can purchase, sell, or exchange gaming NFTs at any time.

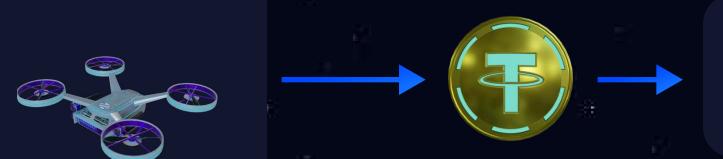

In the marketplace, players can purchase GNFT, NFTM, and NFTL with USDT.

USDT obtained from sales is distributed among the funds.

ECOSYSTEM FUND

To ensure the reliable operation of the metanetwork, a financial instrument (pool) called Ecosystem Fund is provided. It is responsible for insurance, development, and financial regulation both within the network and in the external market.

INVESTMENT OFFER

#1 ANGELS

1 MITI = 0.33 USD

1 500 000 MITI за 495 000 USD

*Projected market price: 7 819 500 USDT

11 500 000 MITI
